

# 15 Point Server & System Analysis

An exclusive offer provided free of charge for Edible Software clients

In today's business environment, administrators need to ensure their IT infrastructure is efficient and reliable. If you have added users and / or modules to your original Edible Software configuration, your current hardware may not be keeping up with your day-to-day business demands. In addition, as you continue to use Edible, your database grows in size, potentially making it less efficient.

In order to improve operational efficiency and avoid potential loss of revenue due to hardware failure or under-performance, Edible Software is now offering a Free 15 Point Server and System Analysis:

## Server Hardware Diagnostics:

- ✓ 1. Complete hardware and software inventory
- ✓ 2. Memory consumption and Efficiency
- ✓ 3. Page file usage
- ✓ 4. Processor utilization and efficiency
- ✓ 5. Hard drive utilization and efficiency
- ✓ 6. Network utilization and efficiency

## Server Software Diagnostics:

- ✓ 7. Review applications and services
- ✓ 8. Check Antivirus for conflicts with SQL and ES
- ✓ 9. Review system and application logs

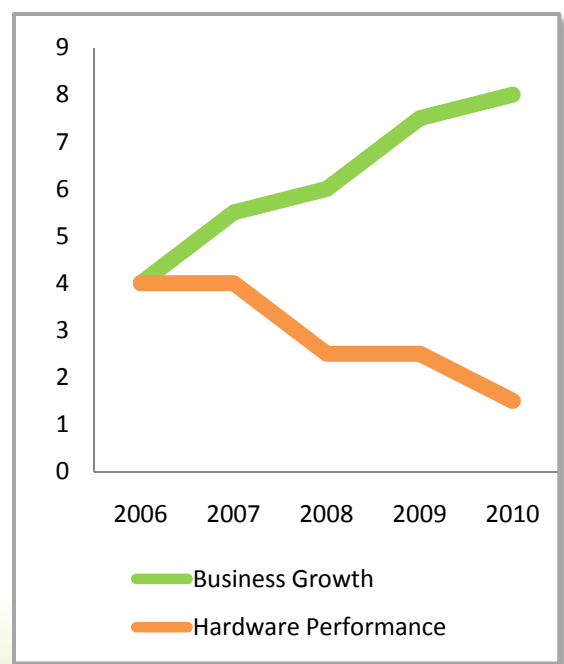

## SQL Server Diagnostics:

- ✓ 10. Review scheduled maintenance jobs
- ✓ 11. Asses database size and fragmentation
- ✓ 12. Asses health of database – properties / statistics
- ✓ 13. Review updates and service packs

## Edible Software Diagnostics:

- ✓ 14. Review Sales Order / Purchase Order history
- ✓ 15. Complete inventory and lot analysis

Typical Business Growth / Server Performance Degradation Scenario

Upon completion, ES IT Solutions will provide 1) a thorough analysis report and 2) performance improvement recommendations.

For additional information or to schedule your free 15 Point Server and System Analysis, please call Nate Woody: 832-200-8000 or email: [nwoody@ediblesoftware.com](mailto:nwoody@ediblesoftware.com).
